Company Overview:

Jazz Pharmaceuticals plc (NASDAQ: JAZZ) is a global biopharmaceutical company whose purpose is to innovate to transform the lives of patients and their families. We are dedicated to developing life-changing medicines for people with serious diseases - often with limited or no therapeutic options. We have a diverse portfolio of marketed medicines and novel product candidates, from early- to late-stage development, in neuroscience and oncology. We actively explore new options for patients including novel compounds, small molecules and biologics, and through cannabinoid science and innovative delivery technologies. Jazz is headquartered in Dublin, Ireland and has employees around the globe, serving patients in nearly 75 countries. For more information, please visit www.jazzpharmaceuticals.com and follow @JazzPharma on Twitter.

Position Overview:

Jazz Pharmaceuticals is a vibrant and forward-thinking company that is dedicated to innovation. As we expand our business, we seek a motivated and skilled API Programming Intern to join our team and help develop advanced APIs that power our products and services.

Key Responsibilities:

- Support EDC User Management and Site Administration activities.
- Understand how to build RESTful APIs and know RESTful design patterns.
- Strong proficiency in one or more programming languages commonly used in API development (e.g., Python, Java, JSON, Net)
- Define API specifications, ensure data integrity, and enhance system efficiency.
- Collaborate with the ServiceNow/IS business partner development team to design, implement, and maintain APIs that support our Veeva CDMS and Medidata Rave EDC platforms.
- Ensure reliability and scalability of APIs with clean, efficient, and well-documented code.
- Troubleshoot and resolve issues related to API integrations and data exchange.

Qualifications:

Jazz Pharmaceuticals®

- Actively pursuing a Bachelor's degree in computer science or a related technical field.
- Must have a minimum GPA of 3.0
- The intern must have high-quality software experience developing REST API using Python/JOSN/.NET and understanding RESTful JSON web API design principles.
- Strong analytic and critical reasoning skills
- Excellent written and verbal communication skills.
- Must be authorized to work in the US for the internship.
- Must be able to complete a 12-14 consecutive week internship between May and August
